

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

Claims 1-12 (Canceled).

Claim 13 (New): A moving picture reception apparatus which receives moving picture data, comprising:

a display for displaying a moving picture based on received moving picture data; and

a network interface through which the moving picture data is transmitted, wherein the moving picture data has a structure comprising:

I pictures (intraframe coded image);

P pictures (interframe forward predictive coded image); and

P' picture which is a forward predictive coded image of a picture immediately preceding an I picture and the I picture, wherein said P' picture is placed preceding or following the I picture.

Claim 14 (New): A moving picture transmission apparatus which transmits moving picture data comprising:

a data transmitter for transmitting the moving picture data; and

a network interface through which the moving picture data is transmitted, wherein the moving picture data is transmitted to a moving picture reception apparatus that displays a moving picture based on the moving picture data, and wherein the moving picture data has a structure comprising:

I pictures (intraframe coded image);

P pictures (interframe forward predictive coded image); and

P' picture which is a forward predictive coded image of a picture immediately preceding an I picture and the I picture, wherein said P' picture is placed preceding or following the I picture.

Claim 15 (New): A moving picture reception apparatus which receives moving picture data, comprising:

a display for displaying a moving picture based on received moving picture data; and

a network interface through which the moving picture data is transmitted, wherein the moving picture data has a structure comprising:

I pictures (interframe coded image);

P pictures (interframe forward predictive coded image); and

P'' picture which is a forward predictive coded image of an I picture immediately preceding the current I picture and the current I picture, wherein the P'' is placed preceding or following the current I picture.

Claim 16 (New): A moving picture transmission apparatus which transmits moving picture data comprising:

a data transmitter for transmitting the moving picture data; and

a network interface through which the moving picture data is transmitted, wherein the moving picture data is transmitted to a moving picture reception apparatus that displays a moving picture based on the moving picture data, and wherein the moving picture data has a structure comprising:

I pictures (interframe coded image);

P pictures (interframe forward predictive coded image); and

P'' picture which is a forward predictive coded image of an I picture immediately preceding the current I picture and the current I picture, wherein the P'' is placed preceding or following the current I picture.
